## Local Happenings

J. H. F. Green of Lethbridge was in town last week.

D. A. Bennett has had a nice sign painted on the front of his store.

Maurice Cooper and Frank Leavitt nearly lived on the streets last week.

Geo. Romerli is doing tractor and automobile repair work at the J. Hyde Shop.

Lee Brewerton, was in Cardston on Sunday moving part of the talkie equipment back from Cardston for the showing of "Interference."

Relief Society Conference will be held Saturday, May 11, the first session at 10 a. m.

Stake Quarterly Conference will be held on May 11 and 12. Opening session Sat. night at 8 p. m.

N. L. Mitchell arrived home Saturday after a hurried trip to Utah to attend the funeral services of his father.

All the wards of the Stake had good representations at the Priesthood and Stake Board meeting on Sunday afternoon.

Well raked lawns and backyards and the painting of houses and general repairs are the order of the day and show a commendable degree of elvic pride. Keep it up.

Rex Wood of the Cardston News staff, was a Raymond visitor Saturday looking over the Intertype in the Recorder office, to be better acquainted with the Intertype the News has on order. He was accompanied by Misses Winnifred Caldwell and Retta Coombs, and Ross Wight.

## At the S. of A.

Donald Douglas, Farm director is expected at the Raymond School today or to-morrow.

The Claresholm and Raymond School of Agriculture are jointly putting on a demonstration under the auspices of the Provincial Womens Institute at their annual convention at the University of Alberta on May 28, 29 and 30. The purpose of this demonstration, which is under the direct charge of Miss Scott of Raymond and Miss Pokotilo of Claresholm is to feature the dressing of Mother and daughter on a modern income.

Miss Scott will go to Claresholm next Tuesday to confer with Miss Pokotilo re the organization of this course.

Principal O. S. Longman was a Calgary visitor last Friday.

Numerous enquiries are now coming in from prospective students and the outlook is already very promising for our 1929 - 30 enrollment. Let us all get behind the school and put it over big this year. Our object is one hundred and a real live campaign will aid a great deal.

Chas Aspland was a visitor in the Glenwood district last week in the interest of the Swine club work. Mr. Aspland reports two vigorous clubs up west, one at Glenwood with 16 members and one at Hill Spring with 33 members.

D. L. Gilbert was a Nobleford visitor last Thursday and Friday.

Wes. Smith who is engaged in fertilizer work is in for a few days due to the condition of the highways. Mr. Smith reports that the farmers are quite enthusiastic over the fertilizer prospects.

Miss Redig and Mr. Gilbert started to Purple Springs on Monday morning in the interest of School Fair work but found the roads impassable and had to turn back. The School Fair Car was parked at Wilson Siding and they came back via C. P. R.

# Priesthood Meeting Is Held

The regular monthly Stake Priesthood meeting was held in the Stake House Sunday at 3:30 p. m. with Pres. H. S. Allen presiding and a very good representation of all wards present. The Stake Choir was present under the leadership of C. F. Tollestrup and rendered the following: Opening song "Now Let us Rejoice", Anthem "Glory be to God on High", and High on the Mountain Top. The choir was accompanied by several instruments and their offerings were well rendered. B. Rolfsen offered the opening prayer and Patriarch Fawns the benediction.

The first business of the meeting was the re-organization of the Stake Presidency of the Y. L. M. I. A. caused by the removal of the first assistant. Mrs. L. D. King was retained as president, Miss Laura Redd was released as 2nd assistant and sustained as 1st and Mrs. Honnie Nalder was chosen as the 2nd assistant. This will necessitate a re-organization in the 2nd Ward Y. L. M. I. A. where Mrs. Nalder has labored as President.

Stake Conference was then announced for Saturday and Sunday, May 11 and 12 th, with Relief Society Conference to convene at 10 a. m. and 2 p. m. Saturday; the first general conference meeting at 8 p. m. Saturday evening, and three sessions on Sunday. Quite a number of auxiliary workers will be present from Salt Lake and conventions of all auxiliary organizations will be held during the Conference.

A grand concert will also be given

by the Stake choir on Friday night May 10, for the purpose of raising funds for purchasing music, etc. for the choir.

Pres. Allen also referred to the statistics of the church, which in all points showed the Taylor Stake to be above average in almost every particular, and very near the top in others, and the President encouraged all present to make the statistics better for the future. Pres. Allen also stated that these statistics were attracting the attention of sociologists and statisticians all over the world because of L. D. S. Church statistics being so much higher than the average of the world in almost every case, particularly the high birth rate and low death rate.

Elder A. Dahl who had attended Annual conference at Salt Lake City reported on his impressions at the conference and said that the Book of Mormon was the outstanding theme of the Conference, and that his testimony regarding the divinity of this work had been materially strengthened.

Elder Hogenson of Stirling ward and Miss Pauline Redd of Raymond, recently returned from the Central States and the Mexican Missions respectively, gave a splendid report of their labors, and added their testimonies to those preceding regarding the Book of Mormon.

Pres. Allen made a few closing remarks and the meeting adjourned for one month.

## Red Trail Will Soon Be Gravelled

Formation of Secondary Road District on Route from Lethbridge to Cardston by Way of Raymond is Sought—Taber Board of Trade Pressing for Graveling of Red Trail

Twelve miles of road from Scott's Coulee, west of Macleod, to the outskirts of the latter town are all that now remains to be gravelled to give Lethbridge the last link whereby it will be possible to travel on all-gravelled roads to the towns of the Crow's nest Pass and points west. Following the thaw of mid-March, soft points in the road developed as the crews were working their way eastward, and operations had to be halted for a time. Another heavy snow storm at the end of the week concluding April 6 did not help matters much, but it is expected that it will only be a few days now till the task is complete. Then apoen of joy from all users of the Red Trail west of Macleod may be anticipated.

### Power Equipment

N. H. Bradley, government road engineer, has announced here that this season all maintenance work on roads leading out of Lethbridge will be done by power equipment instead of horse-drawn machinery. The use

of an Austin motor scarifier-grader in the Crow's Nest Pass last year was so successful, with one man only to operate it, that no doubt the decision to make use of similar machinery on a wider scale is the result. For heavier work than the Austin is capable of doing, it is likely that tractors will be employed. By the way, one is inclined to ask if there is any Canadian-made equipment capable of doing this job. The Austin is made in the States, and is powered with a Deering-McCormick engine. If there is a Canadian-made or assembled machine in the same class it ought at least to have a trial.

### Secondary District

G. L. Stringham, M. L. A. for Cardston, is extremely busy at present endeavoring to organize the district near the Yellow Trail from Lethbridge to Cardston, via Welling, Magrath and Raymond, so as to be able to take advantage of the new legislation governing secondary highways, where by the government will pay half the cost of construction and afterwards take over the entire maintenance free of charge to the districts. Under the new law it will be necessary to bond the district through which the road passes, and in this particular instance it appears probable that the Sugar City Municipal District will require enlargement eastward and westward in order to take care of territory which is at present unorganized. It would seem, too, as if part of the Coaldale Municipality might have to be taken in under the scheme. A further report on this will be given later, but in the meantime work is being done which might well lead to this particular road being the first to be built under the new legislation. There is a keen demand for it, and the farmers are prepared to dig right down in their pockets to put the proposition over.

## NEW BULLETIN ON WEED PROBLEM ISSUED

Alberta's Weed Problem, Bulletin No. 3, has recently been issued by the Field Crops branch of the Alberta Department of Agriculture and is now available for distribution through the office of W. J. Stephen Field Crops Commissioner. This publication brings up to date much valuable information dealing with the control and eradication of noxious weeds in the province, and will be read with attention by farmers and others interested in this problem.

## News Notes

The roads were fairly dry on Thursday when a drizzly rain set in again.

Gordon Brewerton of the Palace Theatre Cardston, was a Raymond visitor Thursday.

There is quite a building activity in the district surrounding Raymond. This is a good sign as it points to stability and prosperity when people decide to make their home on the farm

# Board Of Trade Meeting

The Raymond Board of Trade held its regular monthly luncheon and meeting at the Club Cafe, Wednesday May 1, at 1:20 p. m., with Vice Pres. O. Raymond Knight in the chair.

After the luncheon the minutes of the last meeting were read by Secretary T. L. Halpin, and accepted.

The chairman then called on Frank R. Taylor to report the labors of the committee which had been working throughout the district in an effort to organize the Local Improvement District into a municipal District, for bonding the district to build the proposed Gravelled Highway from Lethbridge to Cardston through Magrath and Raymond. Mr. Taylor reported that quite a number had already signed the petitions asking for inclusion, and that a great many more had expressed their desire to sign, the people in the townships near Magrath being particularly anxious for the road to be built.

Considerable discussion was had pro and con regarding the assimila-

tion of these Local Improvement Districts into the Sugar City M. D., and Sec. O. H. Snow pointed out that it could be done only on a proportionate cost basis, and that the outside districts would have to have proportionately the same reserves in cash and assets, and the same proportion of tax arrears per acre; and that the valuation would have to be adjusted before they would be taken in, which would likely not be before Jan. 1, 1930, at the earliest.

It was also pointed out that even with the bonding of the district the Mill Rate for taxes would still be lower in the Municipality, as the Province had found an increase in the mill rate to be imperative in administering the affairs of the Local Improvement Districts.

The meeting went on record as being in favor of using the prestige of the Board of Trade in an endeavor to get natural gas piped into Raymond from the Southern Alberta Gas fields.

The meeting adjourned at 2:40 until Wednesday noon June 5th.

Those present were: Vice-Pres. O. Raymond Knight, Sec. T. L. Halpin, Wm. Meeks, L. D. King, C. R. Wing, J. W. Evans, F. R. Taylor, T. Geo. Wood, G. W. Leech, O. H. Snow, S. I. May, and three visitors, viz., W. P. Fleming, P. H. Lyman and Mr. Robinson.

# Grand Concert

PROGRAM FOR FRIDAY NIGHT May 10 th

Chorus, — Choir.  
Duet Harold and Ralph Laycock.  
Overture, — Orchestra.  
Vocal Solo — Ira McBride.  
Piano Solo — N. L. Mitchell.  
Vocal Trio — Louie Brandley & Co.  
Vocal Solo — Wm. Clark.  
Flute Solo — Arthur Morgan.  
Vocal Solo — Mrs. John Smith.  
Vocal Duet — T. K. Roberts & Wm. Clark.

Violin Solo — Clyde Jones.  
Solo — John Smith.  
Flute Solo — A. Morgan.  
Vocal Solo — Wm. Clark.  
Male Chorus.  
Mixed Quartet.  
Solo — Mrs. Smith.  
Overture — Orchestra.

The Orchestra will be assisted by instrumentalists from Cardston & Lethbridge.

## Fire Inspector Visits Raymond

On Friday the Fire Inspector of Fire Underwriters of Winnipeg visited Raymond for the purpose of inspection re rates for Fire Insurance in the town. All of the business blocks were inspected and in almost all cases, it was thought probable that a slight reduction might be made. Two places however were not up to the standard of the rest of the town and those will have to be remodelled and made safer to come up to the standard of safety of the other buildings.

The fire wagon, and pumping equipment and pumping plant and power house were all inspected and the possible water force per second was measured from both nozzles on the fire truck, and all these items were satisfactory to the Inspector, considering the size of the town.

Before leaving, he asked for statistics of fires in the town during the past three years and Fire Chief VanOrman very kindly gave the Reorder a copy of these statistics that Raymond citizens may know just how much we have suffered from fire loss.

In 1926 we had two fires, with a loss of \$150,000.00; 1927 saw three small fires with a loss of 1,000.00, and in 1928 we had six fires, with a loss of \$5,700.00. Totalling for the three years a fire loss of \$156,700.00.

While these figures will be believe compare very favorably with almost any town of like population, still they represent a heavy loss, and room for improvement in "Fire Prevention."

## Former Raymond Banker Gets Promotion

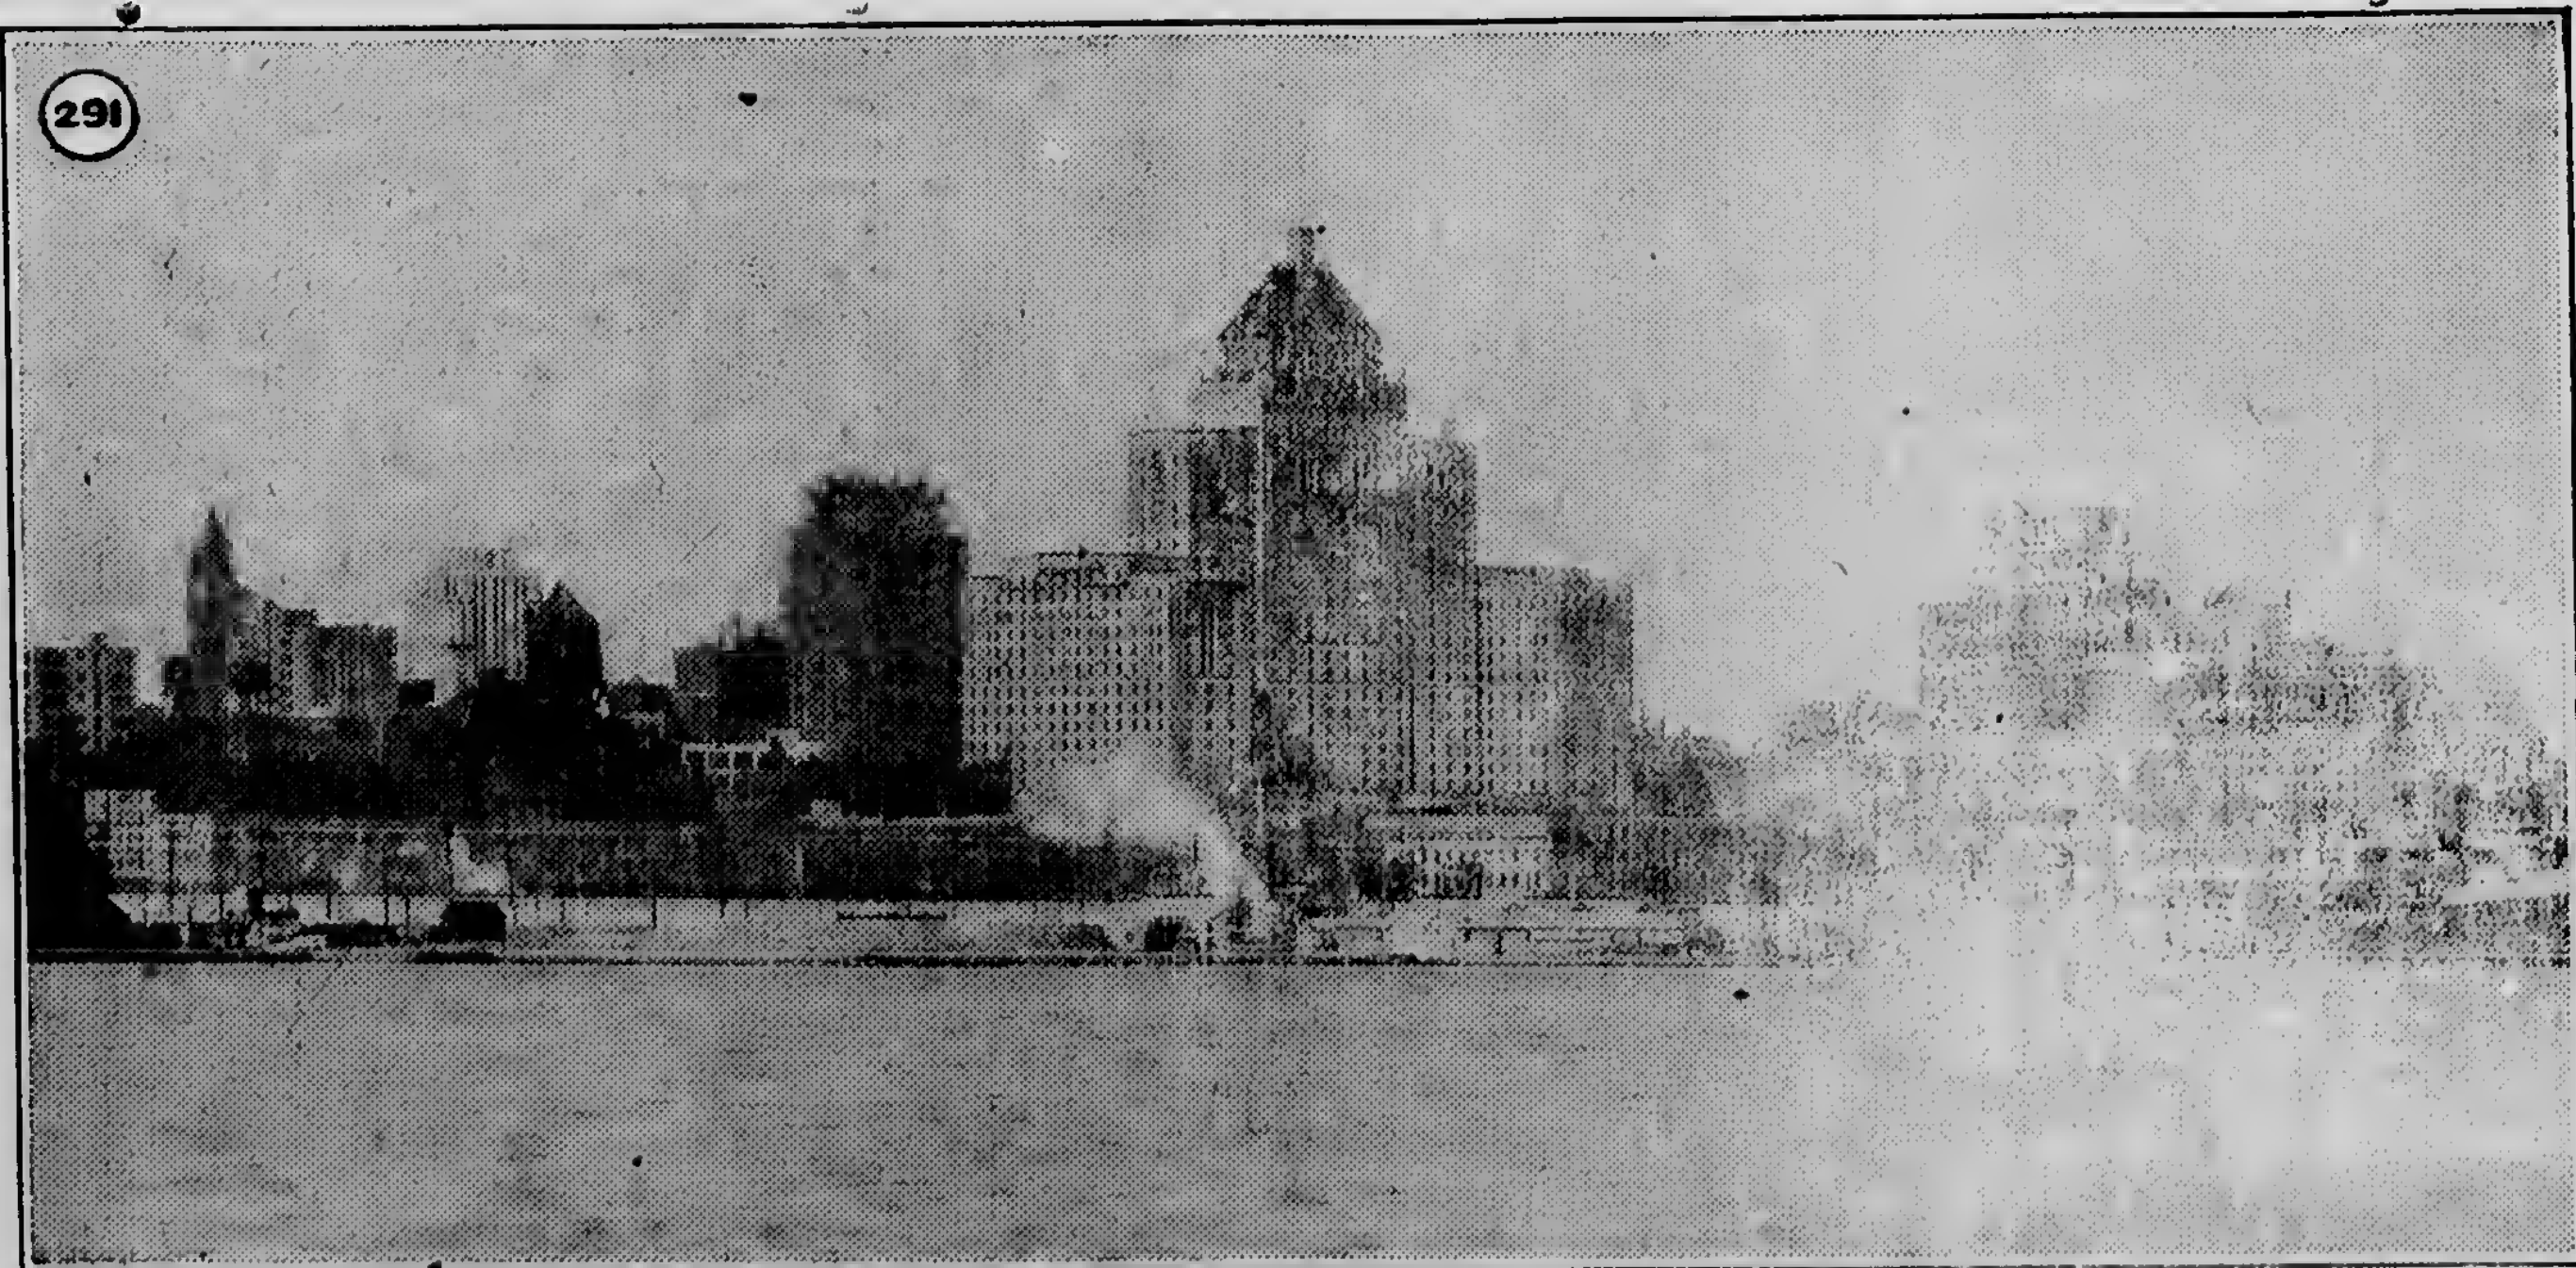

T. Y. Love Going to Bank of Montreal in Montreal; Left Monday

After fifteen years spent in Western Canada as a manager for the Bank of Montreal at various points, T. Y. Love has been transferred from the superintendent's office of the bank in Calgary to the head office of the Bank of Montreal, in Montreal, and left Monday for his new appointment in the east.

During his fifteen years in the west, Mr. Love acted as manager at High River for seven years, at Raymond for five years, and spent two years in Swift Current. During last year he has been attached to the superintendent's office in Calgary, dealing largely with the livestock interests of the bank in this district.

Mr. Love has created a wide circle of friends in Alberta, who will regret his departure. He came to the west from Montreal and Toronto.

Mrs. Love and young son will remain in Calgary for a short time before leaving for the east.

Striking photo of Toronto's new waterfront taken from Hanlan's Point. The latest C.P.R. hotel, the Royal York, stands out prominently in the centre with the new Star building directly behind it and the Sterling Tower half way between it and the City Hall clock tower. On the right are Toronto's original skyscrapers at the corner of King and Yonge.

### HUMAN NATURE.

Isn't it peculiar and somewhat amusing, as well, to notice how quickly and almost automatically human nature reacts to weather changes. When the skies are clear and the weather fair we are gay; care free, optimistic, and to some degree speculative and ready to take a chance. But meet the same people after a few days of clammy, wet weather and see the change in their countenance, hear the nature of their conversation as compared to the bright warm weather, and try to sell them something or get them to make an investment and see how tightly they are squeezing the shekels in preparation for the stringent days of financing which are sure to follow the crop failure, which is certain to come after the first storm which comes as we think, out of season.

Why? Why this decided change. And we may here observe that the changed attitude is pretty general and effects even the professed optimistic if they are not watchful of themselves. I wonder if we really believe that Providence is over All, when we resort to cussing the country, and complaining because our plans have been altered for a day or two.

Wouldn't we all feel better and do better if we would plan our work so that when storms do arise we would have something to do to keep us busy and then when the sun does come out again to warm us up internally as well as externally, we can "get going" again and enjoy the beautiful Alberta sunshine.

We would not have anyone get the idea that we should not be concerned over weather conditions. We are concerned and we must continue so to be. But our point is this. These are things that are beyond our control, so we say why make ourselves and everyone else miserable by doing so much worrying stewing, and talking over something which we cannot alter. We can't change the weather, but if the weather don't suit our plans we can change our plans materially.

It would make an altogether different years ago, and it was a decided see the silver lining behind the clouds. Those who follow the news of the dailies and read of tornadoes, floods, severe blizzards, and various other death dealing agencies which are wrecking hundreds of lives and destroying millions of dollars worth of property will, I am sure agree with us, when we say that we of South-western Alberta have much to be thankful for, and before we do any complaining, about the weather, or anything else, except possibly ourselves, it would, be well for us to stop and "Count Our Many Blessings, Name Them One by One".

### OLD FASHIONED DANCE VERY SUCCESSFUL

The Old Fashioned Dance, held in the Opera House Saturday night under the auspices of Stake Relief Society was one of the most enjoyable and successful dances, both socially and financially that has been held for a long time.

It was a grand sight to see the 80 or more people who took part in the Grand March, filing past the stand in costumes of 5, 10, 15, 20, 30, 40, years ago, and it was a decided contrast to see the young girls in these costumes, as compared to present day fashions.

The hall was well filled, everyone enjoyed themselves, and all will be anxious for the next dance sponsored by the Relief Society ladies.

Study the ads. They are for your information.

King Motors have an ad in this week's Recorder about the new Ford. You should read it.

The Economy Meat Market is opening for business on Saturday, May 4, in the premises formerly occupied by the Piegrass Meat Market. Read their ad.

Mehew Bros. are going to erect a large garage just south of their Hardware store. The new building will be 50 x 80 ft. and the excavating for the foundation is nearly all done. As they already have the agency for the British-American Gasoline and Oil they will be able to care for all the

Secretary Treasurer.

### BABY CLINIC HELD

Miss Emerson of the Nursing Branch of the Department of Public Health held a baby clinic on Monday and Tuesday.

On account of the stormy weather the clinic was not as well attended as in previous years, 12 babies were examined. The clinic was sponsored by the W. 1. and the 1st & 2nd Ward Relief Societies.

### Here and There

(166) Employment officials at Regina state that out of the 6,000 British harvesters brought to Saskatchewan, at least 75 per cent, will remain in the West to become permanent Canadian citizens.

A 700-pound sea cow was shot the other day on the shore of Sea Cow Pond, Prince Edward Island, an inlet which once swarmed with these gregarious, aquatic mammals but which are now a rarity. The animal was bought by a Summerside manufacturing concern which used the hide for leather, the flesh for fox meat and the fat for lubricating oil.

A wool pool in Alberta is now a possibility. Premier Brownlee met a number of representatives of the industry in this province the other day and the subject was opened up in a preliminary way. It will likely come before the executive council for further considerations in the future, the Government being interested in all co-operative efforts by way of advising and encouraging.

The Department of Public Works, at Ottawa, will shortly invite tenders for the first part of the public undertakings, designed to make Prescott, Ont., the transfer terminal for lake traffic. The ultimate outlay at Prescott is estimated at approximately \$5,000,000, covering rail facilities, docks and elevators. It is understood that plans are now being prepared for the railway layout in which both the large railway companies are concerned.

The Lord Nelson Hotel, containing 200 rooms and decorated in the Georgian style, has just been opened in Halifax, Nova Scotia, facing the city's beautiful Botanical Gardens. The opening ceremonies were marked by a dinner given by the Board of Trade to E. W. Beatty, chairman and president of the Canadian Pacific Railway. Up to date in every particular and quietly and tastefully decorated in the period of design recalled by its name, the new hotel will be a landmark in the city.

### POULTRY MANAGEMENT

(By the Alex. Taylor's Hatchery, Winnipeg.)

Of the three phases of Poultry Raising—Feeding, Breeding and Management, there is no doubt that Feeding is commercially most important and to be really profitable one must have a well Bred-to-Lay Flock, take good care of them, feed good feed and keep the Poultry House sanitary. Low average egg production is undoubtedly due to feeding hens entirely on whole grain. Hens fed on grain and given all they want and allowed free range, average fifty eggs per year. Biologically tested Mash has produced 300 egg hens at a small additional cost above grain fed hens. The objects of feeding are to maintain the body in good health, to promote the most rapid and efficient growth to obtain maximum egg production. A hen requires from 75 to 90 pounds of feed per year; 60 to 80 per cent goes to body maintenance. A hen is expected to produce several times her weight in eggs in the course of a year and one that lays 200 two ounce eggs produces approximately 44 ounces of egg shells, that is one of the reasons why minerals play such an important part in poultry feeding. If the feed is not sufficient in mineral protein or carbohydrates the bird's system is unquestionably severely strained. The ration for a laying hen must include the necessary ingredients in the right amount to nourish all parts of the body and make eggs. She may lay for some time at the expense of her body tissues, but ultimately the result is lower egg production and higher mortality. The materials that compose feeds are chemically classified as Carbohydrates, Fat, Protein, Ash and Water. The Carbohydrates and Fat consist essentially of carbon and water, that function is to supply heat, energy and fat for the body tissues also yolk for the egg. The Proteins form the flesh, feathers, tendons, blood and white of the egg. Proteins in the feed should be as nearly like the proteins forming the chicken and the egg as possible. Ash or Minerals play an exceedingly important part in Poultry Nutrition. A Laying Hen needs a large quantity of minerals and to feed a ration de-

### "INTERFERENCE" AT CAPITOL

Raymond "talkie" fans enjoyed their first 100 per cent. talkie program last night when the melodrama "Interference" was shown. A little trouble was experienced because of the reels and records being slightly mixed, and one defective record at the last caused some of the talkie part to be lost. Mr. Brewerton called Calgary this morning and a new record will arrive on this evening's train for the performance tonight and tomorrow night. The picture is one which shows a wealth of fine acting and the plot carries one into the society life of the ones "higher-up." Clive Brook and Doris Kenyon in their parts were excellent. There is also an all-talkie comedy which everyone will enjoy. Mr. Brewerton is deserving of high praise for his enterprise in securing such splendid pictures for Raymond.

The Cod Liver Meal and Oil in the mash not only supplies quantities of minerals but ensures full mineral nutrition to the other feeds in the mash also conditions the blood, strengthens the textures of the shell and health of the hen in winter and summer, also during the moulting season.

### 1ST WARD M. I. A. CONJOINT

The conjoint program of 1st Ward M. I. A. will be held in the High School Auditorium, Sunday evening at 7:30 p.m. H. Ostlund K. C. of Lethbridge will be the principal speaker of the evening, and he will be accompanied by two musicians and a dramatic

### BASEBALL NEWS

The baseball season at the High School opened with a bang only to be stopped by a series of squalls of rain and snow. However the season looks good to us and we are hoping that the near future will bring fairer weather.

There is such a wealth of material in the school that we are having a difficult time to select the best for our team to represent us in the Twilight League.

The boys of the school have been divided in to teams A, B, & C with their respective Captains Lamonte Hansen, Walburn VanOrman & Donald Nilsson. All the boys have a chance to participate. From these teams will be selected the best players of course school standing will be considered — to make up our League Team.

The result of the games already played are:

A & B — 11 to 8 — A's favor  
B & C — 8 to 2 — B's favor  
A & C — 5 to 8 — C's favor  
A & B — 5 to 11 — B's favor

### WHAT WOULD HAPPEN

If Mr. Alfred should smile?  
Or Mike leave off studying just for a while?  
If Agnes was early for once in the year?  
If James should forget to sing and to cheer? At noon!

If Mr. Low stopped when the quitting bell rang?  
If when David was leaving the door wouldn't bang?  
If Monavee wasn't late for early Literature class?  
If Marie left off talking to her red headed lass? So soon!

If Mr. Redd forget his Chemistry?  
(My it would be a mystery!)  
If Francis knew her grammar well?  
And Donald couldn't draw so well?  
If Mr. Blackmore was late for any class?  
And didn't say the clock was fast?  
If Aubrey sluffed his Chemistry  
To practise on his minstrelsy?  
I wonder!

Now that the basketball season is over and spring is here we have more variety in our sports.

A tennis net has been put up in the gym, and several tennis fans have been renewing their acquaintance with the ball and racket.

The girls have reestablished themselves on the soft-ball diamond and every recess sees an enticing game.

There has also been a good deal of high jumping practice and marked ability has been displayed.

Perhaps there are future Olympic champions who are receiving their preliminary training right here at the R. H. S. Who knows?

We understand that the Sophmores ordered their class rings last Saturday. They are sending to the same company that the Grade XI ordered from. We presume that is a compliment to the Junior rings.

Grade X are ambitious in various lines. They have organized an early Literature class with Mr. Blackmore and to prevent irregular attendance have authorized fines of 10c for every late and 15c for every absent student. We hardly think it possible that every one is on time every day, but no official statement as to the extent of the treasury can be obtained at present.

The Junior and Freshmen class each welcomed a new student last week when Merrill and Maurine Palmer of Blackie decided to continue their course at the R. H. S. We are glad to see them, and wish them every success.

### EXTENSIVE DEVELOPMENT OF TAR SANDS PLANNED

Extensive investigation of the bituminous sand deposits in northern Alberta will be undertaken shortly as the first step in the two-year program of development of this valuable Alberta resource by the Scientific and Industrial Research Council of Alberta. The work will be conducted under the direction of Dr. K. A. Clark of the University of Alberta who for the past several years has devoted much time to investigations along this line. The two-year program of tar sands development is an additional feature of the Alberta Government's comprehensive plans for northern development. Keen interest is also shown in the soil survey under the direction of Dr. Wyatt the water survey carried on by Dr. Rutherford and the Precambrian mineral survey to be conducted by Dr. Cameron during the

### ALBERTA WILL CO-OPERATE IN RADIO CONTROL

Co-operation on the part of the Alberta Government was assured the members of the Royal Radio Commission at their session in Edmonton during the past week.

"The government of Alberta" stated Premier Brownlee "is ready and willing to enter into negotiations with the government of Canada and the governments of the various provinces with a view to the organization of public service by some method that may be mutually agreed upon by the said government".

### Here and There

236.

The contract for a new fast steamship to ply between Saint John and Digby, Nova Scotia, will shortly be awarded by the Canadian Pacific Railway, it has been announced by E. W. Beatty chairman and president of the company. The ship will be of the highest standard, 340 feet in length, capable of carrying 600 passengers, and having 44 state rooms for night service. There will also be accommodation for 50 motor cars. The speed of the vessel will be 22 knots, an unusually high speed for a short trip.

The sap ran freely this spring, but it will have to go some to surpass the record for last year when there was an increase of four million pounds of maple sugar registered by government statisticians. The output was valued at over two million dollars, and Quebec headed the list of provinces as producer, followed by Ontario.

The daily pay-roll of the Canadian Pacific is \$267,000; the daily outlay for material and supplies is \$220,000, and the daily tax bill over \$20,000.

Prince George, Duke of Gloucester, third son of His Majesty, will early in June officially open the great Royal York Hotel of the Canadian Pacific Railway in Toronto. It has been announced by E. W. Beatty, K.C., chairman and president of the company. The building is the tallest in the British Empire, towering 23 storeys above the pavements of the "Queen City."

In a recent Calgary high-school oratorical contest in English candidates in the finals were born respectively in Canada, England, Lithuania, Roumania, and Russia. Of three Edmonton candidates one was of French, one of German, and one of Scotch extraction.

Few souvenir-hunting travellers have bagged as fine a prize as Viscount Willingdon, Governor General of Canada, who was presented with one of the biggest Totem Poles on the Pacific coast during his recent cruise in the Princess Norah, latest addition to the fleet of the British Columbia Coastal Steamship services of the Canadian Pacific Railway. His Excellency was given an insight into the activities and potentialities of Vancouver Island and was much impressed by the beauty of the coastal scenery.

A party of immigrants who within a short time are expected to multiply in large numbers and become thoroughly Canadianized, arrived in Montreal recently via the Canadian Pacific Express. They were rabbits—brown rabbits—sent from Germany to points in Ontario for breeding purposes. They appeared to be none the worse for their long journey and constantly plucked at lettuce offered them by a local expressman.

## Three-Fuel Power For Long Life

Hart-Parr builds surplus power over the rating into every three-fuel tractor for just one reason. The tremendous surge of power that makes it possible for a Hart-Parr to pull seven 14-inch plows 6 inches deep in a special test, as has been done repeatedly, also enables a Hart-Parr to do the everyday work of the farm without straining or laboring. Surplus power means wearless parts and long life and explains why many Hart-Parrs are still operating after more than 20 years of farm work. Hart-Parrs are made in their sizes for small, medium and large farms, and have three forward speeds, from 2 1/4 to 4 1/4 miles an hour. Ask for a demonstration.

### CANNING COMPANY EXPECTS BUSY SEASON

Eighteen tons of dried peas snipped into Taber during the past week will be distributed throughout the district and seeded on some 400 acres of land leased by the Broder Canning Co. of New Westminster and Edmonton. In addition, a large amount of seed will be sown in the Edmonton district on the 1,000 acres which the company has leased for the growing of vegetables required for the Edmonton factory. These will include peas, beans,

spinach and beets, and an attempt will be made to grow pumpkins in commercial quantities for canning. Officials of the company express themselves as being well satisfied with the success of last season's operations in Alberta, and propose to extend their program during 1929 and subsequent seasons.

### HOW WE PROGRESS

In the old days if anybody missed a stage coach he was contented to wait two or three days for the next. Now he lets out a squawk if he misses one section of a revolving door.

## FOUR HUNGARY MAIDENS

Four New Canadians from Hungary whose native dances delighted thousands in attendance at the Regina Festival have been judged the Great West Canadian Festival recently brought to a conclusion at Regina, was a success. In attendance it eclipsed its forerunner at Winnipeg last year. Its handicraft exhibit covered a wider range, a more comprehensive representation of the peoples of the West had been arranged for and, in the words of J. M. Gibbon, sponsor of the festival, "Saskatchewan has proved that within its borders is the foundation of an art upon which will be built a structure of national culture finer than that of any other nation on earth." Over a hundred folk-dancers interpreted the dances of many racial groups. Folk-singers numbered over one hundred and sixty. Handicrafts and it is safe to say that next year's festival, which is already being planned, will receive still greater support and present a folk-pageant to be unequalled on the continent. The festivals have been arranged under the auspices of the Canadian Pacific Railway.

## News Notes

Louise Brandley of Sterling was in town Saturday.

W. F. Fleming, cattle buyer, of Lethbridge, was here this week.

Phil Lyman of Lethbridge, was in town Wednesday.

W. C. Stone of the Raymond Mercantile was in Calgary on business the first of the week.

Mr. Robinson, representing R. W. Wallace and Co. was in Raymond this week.

The Togo Cafe had a new floor put in last week, and the barber shop next to it is having one laid this week.

Miss Thera Terry, of Raymond and Mr. Robert Parks, of Lethbridge, were married in Lethbridge on Monday.

Miss Lula Paris returned from Calgary Saturday, where she has been taking a stenographic course.

D. H. H. Heal purchased a Royal Standard Six Nash 4 door Sedan from King Motors on Wednesday, this week.

Mrs. A. Corless returned home Saturday from a visit with her daughter, Mrs. Geo. Mangan, of Portland, Oregon.

We thought we could tell the world this week what fine sunny weather we were having. The weather man apparently thought differently.

The roads between Calgary and Okotoks are said to be very boggy and cars are stuck in the mud, 16 in a distance of three miles according to one report.

Teams were busy again on Wednesday hauling gravel for the Second Ward chapel. The cement work is progressing nicely.

J. E. Maudsley is constructing a modern home on his farm four miles East of Raymond. It will be completely up to date with a delectable system of lighting and water system.

C. H. Elder is having a new office and warehouse built near the Massey-Harris buildings with J. L. Anderson having charge of the work. This will give Mr. Elder a new and we think better location for his business.

The following list of births during April was handed us by Dr. G. W. Leach. Mr. and Mrs. J. H. McPherson, a boy; Mr. and Mrs. Alva Brown, a boy; Mr. and Mrs. Bruce Linkus, a girl; Mr. and Mrs. T. Tanaka, a girl; Mr. and Mrs. J. P. Barton, a girl; Mr. and Mrs. A. L. McMullen, a girl; and Mr. and Mrs. Chas. Trimbisky, a girl.

### STRIVING TO GROW BETTER SPUDS

In spite of a season of low prices, there are many indications that the regular potato growers are staying with the business and are aiming to improve the quality of their produce. Throughout the dominion there have been many demands for lectures on potato growing and control of potato disease during the winter months. Seed trains are touring Manitoba and Ontario, stopping at numerous centers when the officials on board illustrate the principles of successful potato growing, emphasizing the importance of good seed and showing good types of various varieties. Growers are keenly interested and are realizing more fully each year the necessity of good sound seed of a staple variety. The market for certified seed widens consistently year by year, and varieties of little commercial value are being discarded for such proved varieties as Irish Cobbler, Green Mountain Dooley, etc. Growers, too, are cooperating in the purchase of seed, chemicals for seed-treatment and spraying machinery, and in marketing their produce, which augurs well for the future success of the industry. It is a well known fact that ear lots of first grade potatoes of one variety will always secure the best markets and this is the goal to which the table stock growers are now striving.—American Potato Journal.

Drink does not drown ears, but waters it and makes it grow faster.

Sandy Macbeth had starved to death On a one-man car, we applied him, A sign which read "Pay As you leave" lay on the floor beside him.

### SATISFACTORY METHOD OF KILLING WEED SEEDS

The writer's first Peace River summer-fallowing was done 1914. A dirty piece of rented ground was ploughed deeply in June, promptly floated and harrowed and disced often enough thereafter to keep anything from seeding that summer. Autumn appearance indicated that a clean job had been accomplished.

Spring told a different story. The ground was carpeted with a mat of lambsquarters and buckwheat. The summer of 1914 had been dry and apparently a great many weed seeds as well as some grain had lain un-sprouted, to be subsequently brought up to varying depths by the disc. Many were evidently left close enough to the surface to sprout in the fine seed-bed conditions of the ensuing spring.

This and subsequent experiences, particularly in plot work, have taught the writer to germinate as many weed seeds and shattered grain kernels as possible before plowing the land. Otherwise bushels of them will be placed at depths where they will lie in cool storage for one or more years

only to make trouble when finally turned back by implements of tillage.

For years past the system of summer-fallowing on the Beaverlodge Experimental Substation has been to disc or spring-tooth, in autumn if possible, otherwise early in spring, and surface-cultivate until July or in some cases to skim-plough and then do the regular ploughing in July. This not only works well from the standpoint of weed control but also accords with Prof. E. H. Strickland's recommendations for the control of the Northern Prairie wireworm. For this purpose he stipulates that the preliminary surface cultivation should not exceed two and one-half inches in depth.

W. D. Albright, Supt., Beaverlodge, Alta.

### YOUNG IDEAS AT LEAST

Judging by the way they act, most middle-aged people must feel younger than they look.

Frame your mind to mirth and merriment, which bar a thousand harms and lengthen life.
